

## Pascale Cavillon

Ipsen

Pascale Cavillon PharmD. BCMAS, serves as Global Patient Centricity Director at Ipsen. Within the Global Medical Affairs Department she supports the company to work with patients, for patients throughout the product life cycle from R&D to commercialization. In the past 5 years she has built and structured the organisation to allow a collaborative and long term engagement plan with patients by working directly with patient organization and supporting the Ipsen team to integrate patient voice into their work. Before this position she spent 16 years in R&D on different positions and kick off the 1st patient advisory board when she was programs director within global clinical development. She also worked as a coordinator for regulatory submission and has managed programs, studies from Phase I up to Phase IV in the areas of neurology, endocrinology, oncology, woman health and cardiovascular.
