

Abdelali (Ali) Majdi

Vice President, Head of Global
Medical Affairs Precision Oncology

Dr Abdelali (Ali) MAJDI is Vice President, Head of Global Medical Affairs Precision Oncology at Bayer. In this role, he is in charge of accelerating insights and evidence generation strategy to support the Precision Oncology portfolio, with a focus on widespread adoption of comprehensive genomic testing in oncology so that people living with cancer are accurately diagnosed and timely referred to appropriate expertise and care.

Dr Majdi has almost 20 years of pharmaceutical industry experience across a wide range of functions including commercial and medical affairs where he gained a significant leadership and knowledge in building medical affairs teams and strategy in oncology and rare diseases. Throughout his career, Dr Majdi has always championed patient centricity and demonstrated a great ability to leverage collective intelligence and focus to reach meaningful outcomes for patients.

Dr Majdi holds a Medical Degree from the University of Casablanca, Morocco and a Master Degree in Health Marketing and Management from Pierre et Marie Curie University in Paris, in addition to several executive development and leadership programs throughout his industry career. He is member of several scientific societies such as the American Society of Clinical Oncology (ASCO) and the European Society for Medical Oncology (ESMO).
